Integrated Facilities Services

BOOK A DEMO

See Philox in action
at your property

Hospitality is complex.

Running hotels, serviced apartments and commercial facilities means juggling cleaning, audits, staff training, assets and reporting – often across disconnected systems.

Your software should not be.

01

Fragmented Systems

Multiple disconnected tools create data silos and duplicated work.

02

Manual Scheduling

Spreadsheets bunch tasks together and let due dates slip.

03

Unverifiable Work

No proof of where, when, or by whom the work happened.

04

Manual Compliance

Hours spent tracking training, certificates and expiry dates.

05

Poor Staff Engagement

Frontline teams lack one mobile-friendly view of their day.

06

Limited Visibility

Managers lack live status boards and useful reporting.

07

Reported Work Lost

Spills and hazards are reported verbally and never reach the plan.

08

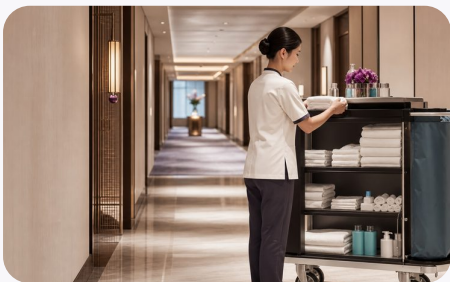

Clients In The Dark

Facilities ask how cleaning is tracking and nobody can show them.

09

Evidence By Hand

Accreditation packs assembled by hand from scattered records.

Philox unifies everything into one intelligent platform.

Shared data, shared permissions and one clear experience across every site you operate.

Everything your operation needs.

A connected suite designed for hospitality and facility teams - not a generic checklist app.

1

Admin Portal

Companies, sites, buildings, people, roles and settings in one place.

2

Staff Roster

Site-level rosters planning staffed hours per position, per day.

3

Daily Cleaning

Service, deep, project and reactive work allocated to roster lines.

4

Cleaning Scheduler

Plan recurring work and auto-stagger a full year in minutes.

5

Cleaning & Laundry Audits

Templates, mandatory comments, photos and geofenced completion.

6

Education & Training

Courses, toolbox talks, competency tests, manuals and enrolments.

7

Assets & Equipment

Registers, service dates, expiry alerts and reporting.

8

Philox Pulse

Tasks, audits, courses, manuals and assets - on any phone.

9

Client Portal

A read-only view for the facility: delivery, audits and reporting.

10

Reporting

Compliance, training, cleaning and audit reports, exported as PDF.

Intelligence built in.

- AI Data Collection
- AI Copilot
- Predictive Analytics
- Executive AI Insights
- Smart Scheduling
- Workforce Optimisation
- AI Compliance
- Business Intelligence

One login. One staff directory. One design language.

No disconnected tools or integrations to maintain.

Plan a year in minutes.

Define frequencies once, auto-stagger the work, and see every occurrence at a glance.

Allocated to positions, not people.

TO POSITIONS, NOT PEOPLE

Work goes to a roster line, never a named person.

COMPUTED ON READ

Today's list resolves from the roster. No nightly job.

NOT DONE, WITH A REASON

A room declined or asleep reads as that, not skipped.

SMART SCHEDULING

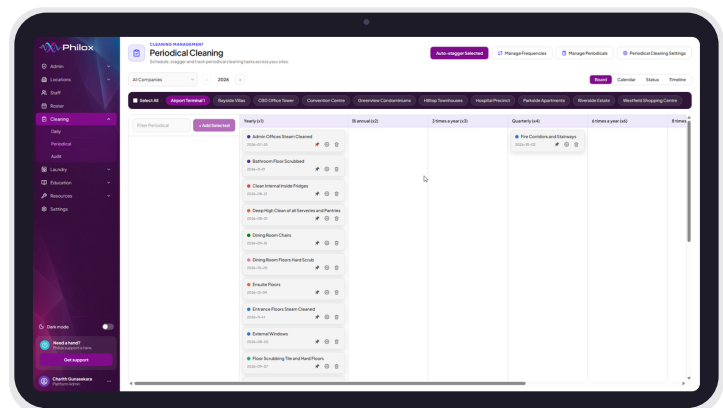

Yearly, bi-annual, quarterly, monthly and custom cycles per site.

AUTO-STAGGER

Balance a full year of recurring work with one click.

LIVE STATUS

Scheduled, due, overdue and completed – always current.

Four regimes, one day grid.

Service clean

Every space, every staffed day.

Deep clean

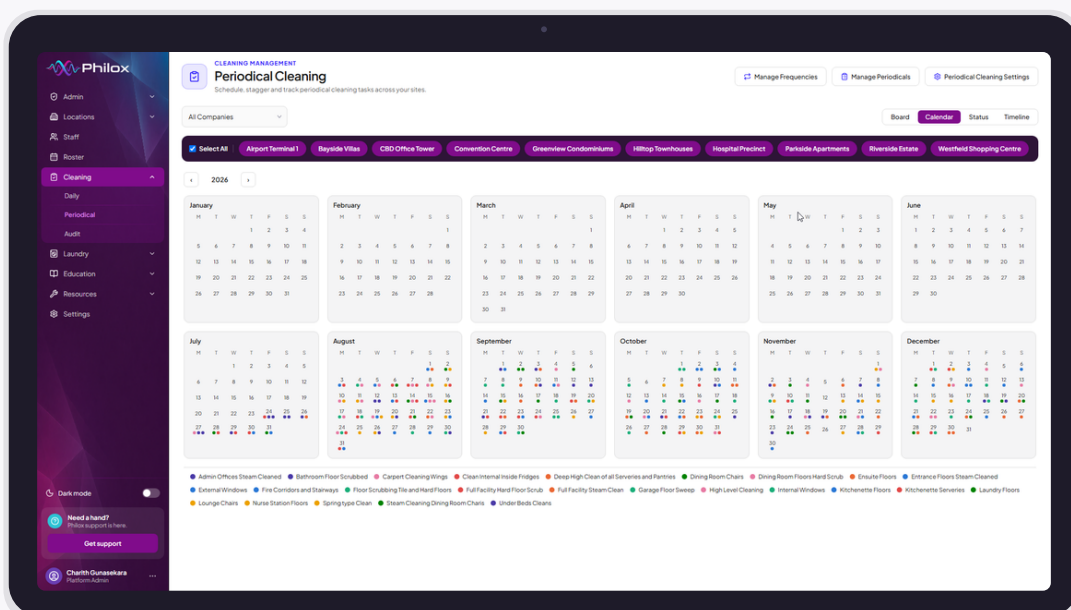

One pass per room per week, at most.

Project cleaning

Named tasks, not tied to a room.

Reactive cleaning

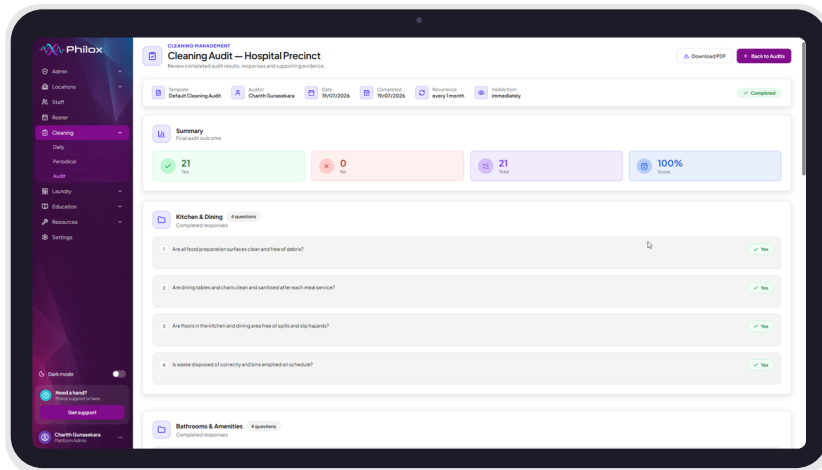

Reported from the floor, triaged in.

Audits you can trust.

Evidence-led inspections, completed on site, exported as branded reports.

Proof, not promises.

- Reusable templates
- Mandatory comments on failed items
- Photo evidence attached to answers
- Geofenced - auditors must be on site
- Draft and resume, then submit
- Works for cleaning and laundry audits

The client sees it too.

● SHARED RESULTS

Completed audits, with the completion map, visible to the facility.

● READ-ONLY BY DESIGN

A contact sees the sites they are a contact of, and changes nothing.

● REPORTED ON SITE

Anyone inside the geofence can report a spill or hazard.

Branded PDF reports

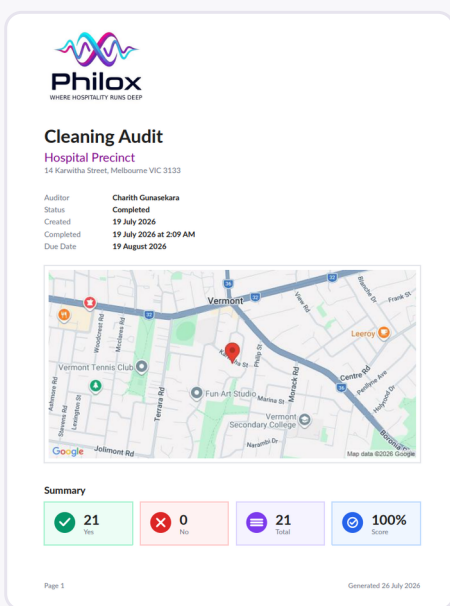

Every audit exports as a professional, logo-branded PDF with results, evidence and a completion-location map - ready to share with clients.

● SHAREABLE

Export clear, branded evidence for clients and owners.

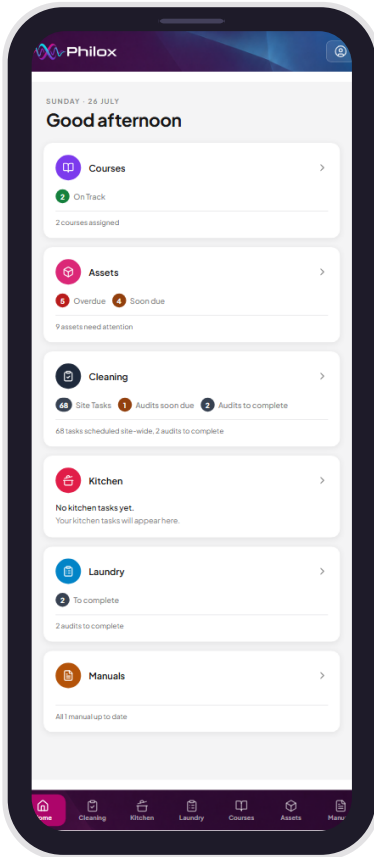

● ACCOUNTABLE

Location, timestamp, photos, comments and answers.

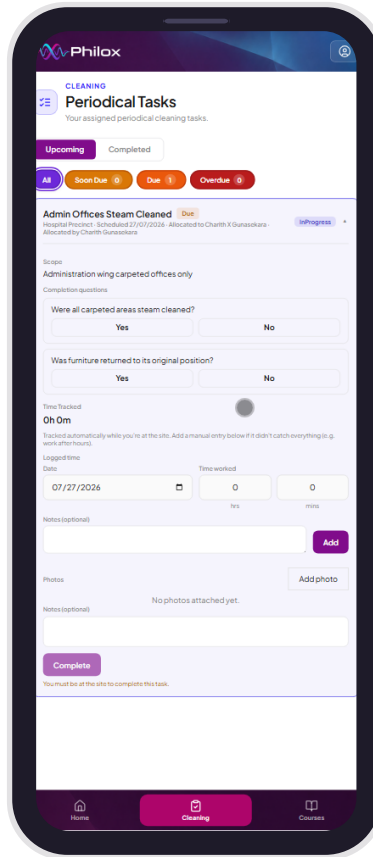

Every site. Every pocket.

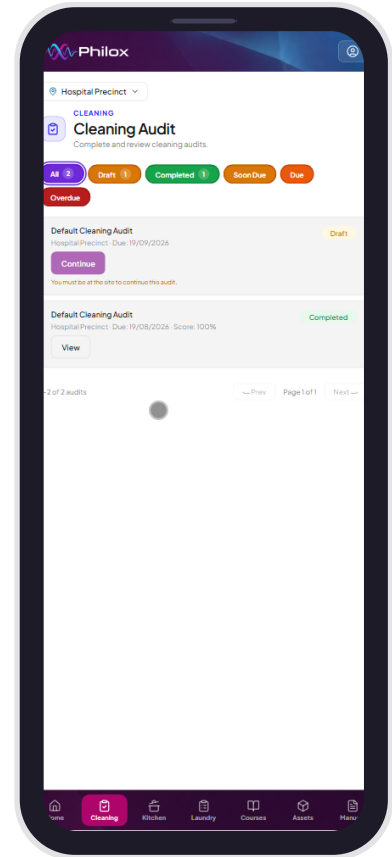

A mobile-first workspace for frontline staff and site managers alike.

PERSONALISED HOME

COMPLETE ON SITE

TRACK EVERY AUDIT

PASSWORDLESS

Sign in with a fingerprint or face

NOTIFIED

Push alerts as work is assigned

Built for the frontline.

Staff see exactly what is theirs to do across cleaning, kitchen, laundry, courses, assets and manuals – with clear due and overdue states.

- PERSONALISED**
 Pinned modules and assigned work
- CONNECTED**
 Courses, assets, audits and tasks
- VERIFIED**
 Time, location, notes and photos
- INSTALLABLE**
 A secure PWA – no app store needed

Built for scale. Designed for security.

Strong foundations, without enterprise complexity.

01

Multi-tenant isolation

Each organisation operates in a secure, isolated environment.

02

Role-based access

Granular permissions precisely scope every role.

03

Automated compliance

Alerts for training, assets, audits and overdue cleaning.

04

Australian hosting

Azure infrastructure with Australian data residency.

05

Enterprise identity

Keycloak, SSO, SAML, OpenID Connect, passkeys.

06

Background automation

Recurring enrolments, reminders and weekly digests.

Reporting, ready for audit.

- Compliance Matrix
- Non-Compliant Staff
- Training Completion
- Asset Test Compliance
- Audit Score Trend
- Audit Rectification
- Periodical Adherence
- Accreditation Pack

Enterprise-grade foundations.

PostgreSQL | Kubernetes | Keycloak | Micro-frontends

Secure, scalable and designed for always-on operations.

Ready to transform your operations?

Bring cleaning, audits, training, assets and scheduling together in
one intelligent hospitality platform.
